Erin,

By our procedure, I am the person with the final decision in making around accommodations, so you can copy me. It may be helpful to let Joanie's team know who the boys are who refused the masks so they are aware as well in case this is a pattern.

Peter

Happy to do that but who decides about his medical condition and the appropriateness of a face mask. I would like to copy that person on my communication as the program starts tonight.

On the mask-wearing front, this past weekend at boys hs basketball Luanne had to dismiss some players from the building when they refused to wear a mask or wear it properly. They seem to be getting worse about it, not better.

Erin,

I think you can let him know that we still have a mask requirement in place and that if he has a medical condition that would interfere with his ability to wear a mask then we are happy to discuss appropriate accommodations such as a face shield.

Hi All,

Hoping for an update/direction regarding the player who refuses to wear a mask as our volleyball sessions begin tomorrow.

Thanks,  
Erin
